#### ABSTRACT

This report summarizes the participation information provided by state educational agencies for the Migrant Education Program, 1986-87, the third year in which data was submitted in a prescribed format. The District of Columbia, Puerto Rico, and all states except Hawaii submitted data on program participation by ethnic group, migrant status, gender, and year of birth; on participation patterns by grade and service area for regular and summer terms; and on staffing for regular and summer terms. Of the 343,269 total participants: (1) 75% were Hispanic and 12% were white; (2) 53% were formerly migrant, 30% were currently interstate migrant, and 17% were currently intrastate migrant; (3) 52% were male and 48% were female; and (4) 12% were born 1981-87, 49% were born 1975-80, 36% were born 1969-74, and 3% were born 1964-68. Participants totaled 300,674 in the regular term and 104,751 in the summer term, down 7% from 1985-86 in each case. The most frequent category of service provided was attendance and guidance services (71% of regular term participants, 79% of summer term participants), followed by reading (44% regular term, 66% summer term), and mathematics (32% regular term, 65% summer term). The Migrant Education Program funded 10,770 full-time equivalent staff in the regular term and 10,427 in the summer term. About 75% of total staff in both terms were teachers and teacher aides. This report contains 44 tables, 11 figures, and a description of methodology used. (SV)

CONTRACT NO. 300-86-0094

FEBRUARY 1989

This report was prepared pursuant to Contract Number 300-86-0094, U.S. Department of Education. The cost of the project was \$60,000. The opinions and conclusions expressed in this report are those of the authors and do not necessarily represent the position or policies of the U.S. Department of Education.

#### **ACKNOWLEDGEMENTS**

We wish to thank the many individuals who contributed to the completion of this report. Particularly helpful to our efforts were several individuals in the U.S. Department of Education. James English of the Office of Planning, Budget, and Evaluation, who served as our Project Officer, and William Stormer, Dustin Wilson, Patrick Hogan, and Daisy Greenfield of the Migrant Education Frogram provided us with direction and guidance throughout the study.

We are also grateful to the Chapter 1 Migrant directors and program evaluators in each state for their cooperation and assistance in verifying the information submitted on the State Performance Reports for 1986-87.

Other DRC staff who deserve special recognition include Diane Steele for contributing to Volume 2 of this report, Leslie Anderson for cheerfully assembling the state-level tables and Saunders Freeland for her expert typing of this document.

## A SUMMARY OF STATE CHAPTER 1 MIGRANT EDUCATION PROGRAM PARTICIPATION AND ACHIEVEMENT INFORMATION FOR 1986-87

#### EXECUTIVE SUMMARY

This report encompasses two volumes and summarizes the participation and achievement information provided by state educational agencies (SEAs) on the ECIA Chapter 1 Migrant Education Program for the 1986-87 school year. The 1986-87 school year was the third year in which SEAs were required to submit participation information using a prescribed format (the State Performance Report). For achievement information, statewide data summaries were requested, although no specific format was required.

This volume presents the participation information, while Volume 2 provides the achievement information.

From discussions with SEAs about this information, it appears that, for the most part, state officials believe that the data reporting requirements were better understood for the second and third year's submission. As a result, more accurate and complete information was reported for the 1985-86 and 1986-87 school years than had been reported for the 1984-85 school year. I

Of the 343,269 total migrant education program participants (as categorized by ethnic group, migrant status, and gender) in 1986-87, 75 percent /ere Hispanic and 12 percent were white. The remaining ethnic groups each constituted less than 5 percent of the total.

In 1986-87, 53 percent of the participants, as classified by migrant status, were settled out migratory youths (formerly migrant), 30 percent were interstate migratory youths (currently migrant across states), and 17 percent were intrastate migratory youths (currently migrant within a state). Only 3 percent of the participants were classified as children of migratory fishers.

There were 300,674 participants in the regular term, and 104,751 participants in the summer term in 1986-87. The largest percentage in both the regular term (55 percent) and the summer term (59 percent) were in grades 1-6.

<sup>1</sup>SEAs were provided the opportunity to review the submitted State Performance Report information. In several instances, SEAs revised data for either 1985-86 or 1986-87. To the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

The number of participants decreased from 1985-86 to 1986-87 by 7 percent in both the regular and summer terms. Decreases were experienced in each grade span in both terms. In the regular term, decreases ranged from 6 to 8 percent. In the summer term, decreases ranged from 3 percent in pre-kindergarten and kindergarten to 17 percent in grades 10-12.

Attendance and guidance services were provided to the largest percentage of participants (71 percent) in the regular term, followed by reading (44 percent) and mathematics (32 percent).

In the summer term, 79 percent of the participants were provided with attendance and guidance services, 66 percent received reading and 65 percent received mathematics instruction.

A larger percentage of participants in the summer term than in the regular term received services in each of the service categories except other supporting services.

In 1986-87, there were 10,770 full-time equivalent staff funded by the migrant education program in the regular term, and 10,427 in the summer term. Teachers and teacher aides composed about three-quarters of the total staff in both terms. Differences were seen in the distribution of staff in each term. In the regular term, there were more teacher aides (47 percent) than teachers (24 percent), whereas in the summer term, there were more teachers (39 percent) than teacher aides (31 percent).

In the regular term, there was a ratio of 39.6 participants per teacher and teacher aide combined, compared to seven participants per teacher/teacher aides in the summer term.

#### INTRODUCTION

Recognizing that the migratory children of migratory agricultural workers were disadvantaged, P.L. 89-750 was enacted in November 1966, amending Title I of the Elementary and Secondary Education Act (ESEA), to authorize a program of rervices for these youths. The 1986-87 migrant education program, authorized by Sections 141-143 of Chapter 1 of the Education Consolidation and Improvement Act (ECIA), provided funds to state educational agencies (SEAs) for "programs and projects...which are designed to meet the special educational needs of migratory children of migratory agricultural workers or of migratory fishermen, and to coordinate such programs and projects with similar programs and projects in other states, including the transmittal of pertinent information with respect to school records of such children" (Section 142).

#### OVERVIEW

Sections 555(d) and (e) of Chapter 1, respectively, specify SEA responsibilities for (1) maintaining records and information, and (2) conducting evaluations and collecting data. These sections state:

- (d) Records and Information: Each State educational agency shall keep such records and provide such information to the Secretary as may be required for fiscal audit and program evaluation (consistent with the responsibilities of the Secretary under this chapter).
- (e) Evaluation: Each State educational agency shall-
  - (1) conduct an evaluation of the programs assisted under this chapter at least every two years and shall make public the results of that evaluation; and
  - (2) collect data on the race, age, and gender of children served by the programs assisted under this chapter and on the number of children served by grade-level under the programs assisted under this chapter.

While these requirements obligated SEAs to report data to the Federal government, the Department of Education (ED) did not initially specify the format nor provide guidelines for the information to be collected. As a result, states developed their own locally relevant criteria for collecting participation information.

In 1983, however, the ED General Counsel determined that all SEAs were required by the Chapter 1 statute to submit standardized information on the migrant education program to

ED. To implement this decision, ED solicited input from SEAs on the most appropriate measures and assembled a standard format for reporting of the participation information. The resulting standard form (the State Performance Report) received final approval by the Office of Management and Budget (OMB) in the spring of 1985. The 1984-85 school year was the first year of data collection using this form.

Further, ED published rules and regulations pertaining to these requirements in Volume 34 of the Code of Federal Regulations (7/1/86). In reference to the evaluation requirement, the Department stated:

§204.23 Evaluation.

- (a) SEA evaluation.
  - (1) Each SEA shall-
    - (i) Conduct an evaluation of the Chapter 1 programs in the State at least once every two years and make public the results of that evaluation; and
    - (ii) Collect data annually on-
      - (A) The race, age, and gender of children served by the Chapter 1 programs in the State; and
      - (B) The number of children served by grade level under the Chapter 1 programs in the State.
  - (2) To meet the requirements in paragraph (a)(1)(i) of this section, the SEA may, for each Chapter 1 program, aggregate evaluation data collected under paragraph (b)(1)(i) of this section to obtain Statewide totals.

This report summarizes the 1986-87 State Performance Reports for the ECIA Chapter 1 Migrant Education Program. 1 The information for the 1986-87 school year was submitted by the SEAs in the winter and early spring of 1988. These performance reports provide information on the number of participants (by gender, year of birth, ethnic group, migrant status, and grade

ln 1986-87, State Performance Reports were received from 49 states, the District of Columbia, and Puerto Rico. Hawaii does not participate in the migrant education program.

2

by regular term/summer term), the types of services provided (by regular term/summer term), the number of staff (by regular term/summer term), and achievement (by regular term/summer term). The participation information, collected and reported according to the prescribed format, is presented here in Volume 1. For achievement, statewide data summaries were requested, and any format desired by the SEA could be used. Volume 2 provides a description of the achievement information submitted by the SEAs for the 1986-87 school year.

The 1986-87 school year was the third year for which State Performance Report information was collected. From discussions with SEAs about this information, it appears that, for the most part, state officials believe that the data reporting requirements were better understood for the second and third year's submission. As a result, more accurate and complete information was reported for the 1985-86 and 1986-87 school years than had been reported for the 1984-85 school year.

#### ORGANIZATION

The remainder of this document presents the national participation and staffing information in two ways: (1) for 1986-87, and (2) changes from 1985-86 to 1986-87. The information is discussed in the following order:

- o participation by ethnic group,
- o participation by migrant status,
- o participation by gender and year of birth,
- o regular term participation patterns by grade and by service area,
- o regular term staffing,
- o summer term participation patterns by grade and by service area,

<sup>&</sup>lt;sup>3</sup>SEAs were provided the opportunity to review the submitted State Performance Report information. (See Appendix A for a description of the methodology used.) In several instances, SEAs revised data for either 1985-86 or 1986-87. To the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

<sup>&</sup>lt;sup>2</sup>To the extent that data limitations were enumerated by SEAs, these cautions are provided in the text and in the accompanying tabular displays of the information in this report.

- o summer term staffing, and
- o regular term and summer term comparisons.

A description of the methodology used to review the State Performance Report information for 1986-87 is presented in Appendix A. State level participation and staffing information for 1986-87 is provided in Appendix 3, while Appendix C displays year-to-year changes by state from 1985-86 to 1986-87. The state composition of the three migrant streams is displayed in Appendix D. Finally, Appendix E provides tabular descriptions of the other instructional services, other supporting services, and other staff reported by each state for both the regular and the summer terms.

#### PARTICIPATION BY ETHNIC GROUP

In 1986-87, there were 343,269 participants in migrant education programs, as reported by ethnic group. Hispanics composed the largest ethnic group, with 75 percent of the participants classified as Hispanic. The next largest ethnic group was white at 12 percent. The remaining groups--American Indian or Alaskan Native, Asian or Pacific Islander, and black--each constituted less than 5 percent of the total. (Four percent of the participants were classified as race unknown/other.) (Figure 1 and Table 1)

Fifty-six percent of the total participants reported by ethnicity were concentrated in three states--California, Florida, and Telas. In two-thirds of the states, 50 percent or more of the participants were Hispanic in 1986-87. (Table B.1)

Over one-half of the Hispanic and Asian/Pacific Islander participants and almost three-fourths of the American Indian/Alaskan Native participants were located in western stream states. Eighty-one percent of blacks and over 50 percent of whites were reported in the eastern stream states. 4 (Table 2)

Nationally, there was a 6 percent decrease from 1985-86 to 1986-87 in the total migrant education participation by ethnic classification. The distribution among ethnic groups in each year was roughly the same, with the largest ethnic group in both years as Hispanic. The 20 percent decrease in the black category is due, in large part, to Florida, which accounted for 71 percent of the national decrease. The large increase in the American Indian or Alaskan Native category can be explained by significant program expansion in Alaska. States reported 13 percent fewer participants in the race unknown category. (Table 1 and Table C.1)

In reviewing the information in this category, two data items should be noted. First, Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report. Second, in 1985-86, Washington reported numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count.

<sup>&</sup>lt;sup>6</sup>This data note will apply to all categories of information submitted by Florida on the State Performance Report for 1986-87.

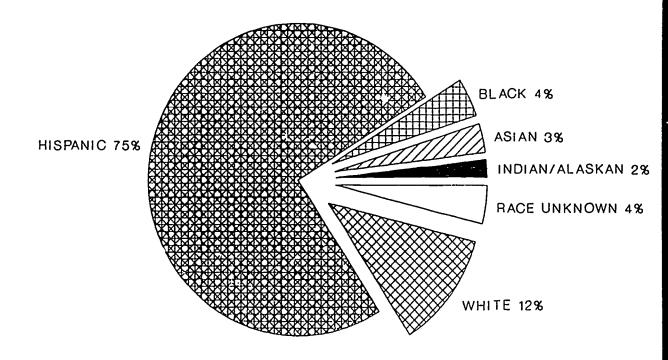

<sup>&</sup>lt;sup>4</sup>See Appendix D for a list of states by migrant stream.

<sup>&</sup>lt;sup>5</sup>Twelve states reported participants classified as race unknown/other in 1985-86. Eighty percent of the participants in this category were reported by California and Michigan.

#### FIGURE 1

<sup>2/</sup> Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

In 1985-86, Washington presented numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count. Washington submitted an unduplicated count in 1986-87.

See Appendix Tables B.1 and C.1 for state-by-state ethnicity data.

- b/ Florida accounted for 71 percent of the nation's decrease in black participants.
- E/ Five states in 1985-86 did not report the same totals by ethnic group, migrant status, gender, and year of birth. In 1986-87, four states did not report the same total for year of birth as they did for the other three demographic characteristics. As a result, the totals for these four demographic characteristics are not exactly the same.

a/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

See Appendix Tables B.1 and C.1 for state-by-state ethnicity data.

 $\underline{b}$ / The total includes 12,458 participants in the race unknown/other category.

#### PARTICIPATION BY MIGRANT STATUS

In 1986-87, the total number of participants reported by migrant status was the same as the number of participants reported by ethnic group--343,269.7 Fifty-one percent of the participants were agricultural settled out (formerly migrant), followed by 30 percent agricultural interstate (currently migrant across states), and 16 percent agricultural intrastate (currently migrant within a state). Fishers composed about 3 percent of the total. (Figure 2 and Table 3)

About 60 percent of the participants who were classified as fishers were reported in two states--Alaska and Louisiana. (Table B.2)

An examination of migrant status by migratory stream reveals that the western stream predominates both the intrastate (49 percent) and settled out (50 percent) categories of agricultural participants, while the largest share of agricultural participants who migrate interstate are within the central stream (41 percent). Among participants who are fishers, intrastate migration is primarily located in the western stream (79 percent) -- mainly due to the large numbers of fishers in Alaska. (Table 4)

Shifting the focus to patterns within each migratory stream, the data reveal that settled out participants represent the largest group of agricultural participants within each About 58 percent of the agricultural participants in stream. the western stream are settled out, compared to approximately one-half of those in the eastern (49 percent) and central (47 percent) streams. Agricultural participants who migrate interstate comprise the next largest group within each stream (ranging from 37 percent in the central stream to 36 percent in the eastern stream to 24 percent in the western stream). than 20 percent of the agricultural participants migrate intrastate within each stream. The distribution among fishers is more varied. Settled out migrants comprise the largest group of participants in both the eastern (67 percent) and central (75 percent) streams, while intrastate migrants are the largest group in the western stream (65 percent). (Table 4A)

Nationally, there was a 6 percent decrease from 1985-86 to 1986-87 in participation reported by migrant status. There were decreases in all but one migrant status category; the

9

<sup>&</sup>lt;sup>7</sup>In both 1985-86 and 1986-87, Texas included students identified, but not necessarily served, in the migrant status category. a/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

In 1985-86, Washington presented numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count. Wa ington submitted an unduplicated count in 1986-87.

In both years, Texas included students identified, but not necessarily served in the migrant status category. With the approval of the Texas SEA, the migrant status figures were adjusted proportionally to reflect the number of participants as reported by ethnicity, gender, and year of birth.

See Appendix Tables B.2 and C.2 for state-by-state migrant status data.

Five states in 1985-86 did not report the same totals by ethnic group, migrant status, gender, and year of birth. In 1986-87, four states did not report the same total for year of birth as they did for the other three demographic conteristics. As a result, the totals for these four demographic characteristics are not exactly the same.

2/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

In 1985-86, Washington presented numbers for the regular and summer terms separately. These numbers were combined and, therefore, represent a duplicated count. Washington submitted an unduplicated count in 1986-87.

In both years, Texas included students identified, but not necessarily served, in the migrant status category. With the approval of the Texas SEA, the migrant status figures were adjusted proportionally to reflect the number of participants as reported by ethnicity, gender, and year of birth.

See Appendix Tables B.2 and C.2 for state-by-state migrant status data.

#### PARTICIPATION BY GENDER AND YEAR OF BIRTH

In both 1985-86 and 1986-87, 52 percent of the migrant education program participants were male and 48 percent were female. Nationally, there was a 6 percent decrease in the number of participants as classified by gender. (This is the same decrease as was seen in the number of participants as categorized by ethnic group and by migrant status.) (Table 6)

There were 343,263 participants reported by year of birth in 1986-87. Almost one-half of the migrant education participants were born between 1975-80, the years that can be considered to contain children of elementary school age. Thirty-six percent were born between 1969-1974, the years that can be considered to contain children of secondary school age. Twelve percent of the participants were born in the years 1981 to 1987, which can be considered to contain children eligible for kindergarten or younger. Participants born in 1964 through 1968 can be considered to be 18 years and older; this age group constituted only 3 percent of the participants. (Table 7) A similar distribution of migrant education participants was seen in 1985-86. (Table C.4)

<sup>&</sup>lt;sup>8</sup>Four states did not report the same totals for year of birth as they did for ethnic group, migrant status, and gender.

<sup>\*</sup> Less than 1 percent.

2/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

See Appendix Tables B.4 and C.4 for state-by-state year of birth data.

b/ Five states in 1985-86 did not report the same totals by ethnic group, migrant status, gender, and year of birth. In 1986-87, four states did not report the same total for year of birth as they did for the other three demographic characteristics. As a result, the totals for these four demographic characteristics are not exactly the same.

#### REGULAR TERM PARTICIPATION PATTERNS

#### PARTICIPATION BY GRADE

There were 300,674 participants reported by grade in the regular term. The largest concentration of participants was in grades 1-6 (55 percent), followed by 21 percent in grades 7-9, 12 percent in pre-k and kindergarten, and 11 percent in grades 10-12. (Ungraded participants accounted for 1 percent of the total.) (Figure 3 and Table 8)

Overall, there was a 7 percent decrease from 1985-86 to 1986-87 in the number of participants reported by grade in the regular term. There were decreases in all grade spans, ranging from 8 percent in grades 10-12 to 6 percent in grades 1-3. The percentage distribution among grade spans was exactly the same in both years. (Figure 3 and Table 8)

A comparison of the number of migrant education participants in the regular term and the number of students enrolled in public elementary and secondary schools shows that, nationally in 1986-87, almost 1 percent of the students in public schools were migrant education participants. Alaska had the largest percentage of migrant education participants (4 percent). In an additional 10 states and Puerto Rico, this participation rate was over 1 percent. (Table 9)

In both years, three states--Montana, Nebraska and Wyoming--did not offer migrant education programs in the regular term.

#### PARTICIPATION BY SERVICE AREA

In 1986-87, attendance and guidance services were received by the largest percentage of participants (71 percent), followed by reading (44 percent), mathematics (32 percent) and health (31 percent). (Figure 4 and Table 10)

All states with regular term programs offered at least one instructional service, while all but three states offered at least one supporting service. All states offered reading services and all but one state offered mathematics to migrant students. In 23 states, reading services were provided to over one-half of the migrant participants reported by grade in the regular term. Twenty-six states provided attendance and guidance services to over 50 percent of migrant students. One-fourth of the states did not provide health services, and one-third did not provide dental services to participants. Forty-three states offered other instructional services, and 22 offered other supporting services. (See Appendix E for the type of other services reported, by state.) (Tables 11 and B.7)

The number of participants receiving instructional services increased in all but two categories from 1985-86 to 1986-87. Increases in the number of participants served in the instructional service areas ranged from 3 percent in mathematics to 25 percent in English to limited English background. A 6 percent decrease in other instructional services was reported, while the number receiving reading services decreased less than 1 percent. (Table 10)

The expansion of English to limited English background services in California, Massachusetts, and Michigan, and the addition of those services to Washington's migrant education program was responsible for most of the 25 percent increase in the national total. Several states (California, Florida, Michigan, and Texas) reported large increases in other language arts, yielding a 16 percent gain in the national total. (Table C.7)

In the supporting service areas, there were increases in four categories and decreases in two service areas. Attendance and guidance, and transportation services experienced the greatest increases in the number served (50 and 42 percent, respectively). (Table 10)

Two states--California and Florida--accounted for 85 percent of the increase in the national attendance and guidance totals, while increases in Florida's transportation services accounted for 72 percent of the national increase. (Table C.7)

Increases were also reported in nutrition services (26 percent) and other supporting services (4 percent), while decreases in the number served were experienced in dental services (15 percent) and health services (12 percent).

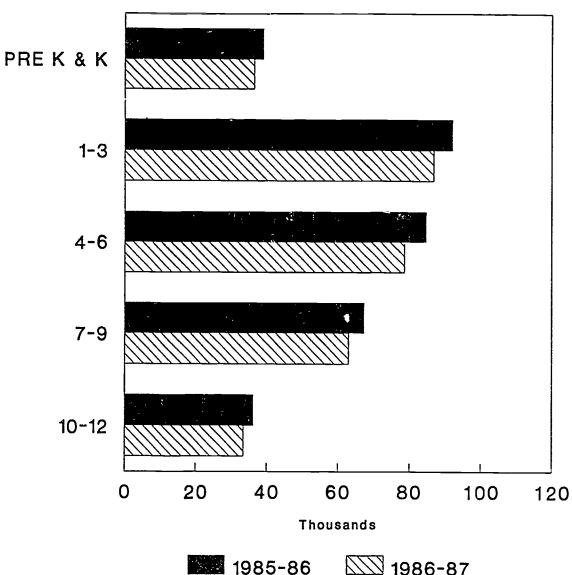

While the percent served in most categories remained roughly the same in both years, there was a notable change in the attendance and guidance category. In 1985-86, 44 percent of the participants received attendance and guidance services, whereas in 1986-87, the percentage increased to 71 percent. (Table 10)

a/ In 1986-87, Montana, Nebraska, and Wyoming did not offer migrant education programs in the regular term.

See Appendix Table B.7 for the percent served by state.

 $<sup>\</sup>underline{b}$ / See Appendix E for the type of other services reported, by state.

#### REGULAR TERM STAFFING

In 1986-87, there were 10,770 full-time equivalent (FTE) staff in the regular term funded by the migrant education program. Three categories of staff--teachers, teacher aides, and curriculum specialists (those staff that can be considered to provide instructional services)--composed nearly three-quarters of the total staff. In particular, teacher aides constituted 47 percent and teachers 24 percent of the total staff. The next largest percentage was supporting staff at 9 percent. (Figure 5 and Table 12)

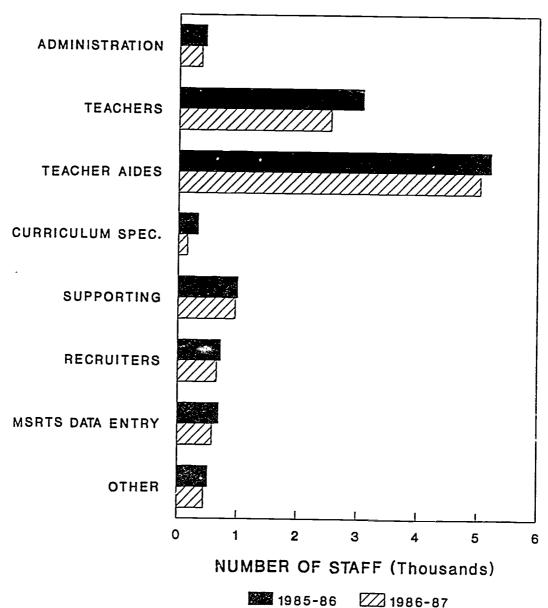

From 1985-86 to 1986-87, total staff decreased 11 percent. Decreases were experienced in all categories, ranging from a 55 percent decrease in curriculum specialists to a 4 percent decrease in teacher aides. The number of FTE teachers decreased 17 percent, while administrative staff also decreased 17 percent. The percentage distribution remained about the same in both years, although there was a slight shift from teachers to teacher aides in 1986-87. The number of MSRTS data entry specialist decreased by 17 percent, and recruiters decreased almost 10 percent. (Table 12)

The majority of states with curriculum specialists reported decreases in that category. The most frequent explanation provided by SEAs for this decrease was that curriculum specialists were often reclassified into other staff categories. Twenty-five states reported a reduction in the number of teachers. Texas was responsible for large percentage decreases in three staff categories: administrative staff (88 percent), MSRTS data entry specialists (75 percent) and teachers (74 percent). California and Texas accounted for a large percent of the national decrease in the number of recruiters. (See Appendix E for the type of other staff reported, by state.) (Table C.8)

a/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

In both years, Montana, Nebraska, and Wyoming did not offer migrant education programs in the regular term.

See Appendix Tables B.8 and C.8 for state-by-state FTE staff data.

b/ See Appendix E for the type of other staff reported, by state.

#### SUMMER TERM PARTICIPATION PATTERNS

#### PARTICIPATION BY GRADE

There were 104,751 participants reported by grade in the summer term. The largest number of participants were in grades 1-6 (59 percent), followed by 21 percent in pre-kindergarten and kindergarten, 13 percent in grades 7-9, and 6 percent in grades 10-12. (Ungraded participants composed only 1 percent of the total.) (Figure 6 and Table 13)

The 104,751 participants in 1986-87 represented a decrease of 7 percent from 1985-86. There were decreases in all grade spans, ranging from 17 percent in grades 10-12 to 3 percent in pre-kindergarten and kindergarten. (The number classified as ungraded decreased 58 percent.) The distribution among grade spans was about the same in both years. (Figure 6 and Table 13)

Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota did not offer summer migrant education programs in 1985-86. In 1986-87, the District of Columbia, Iowa, Louisiana, Mississippi, Nevada, Oklahoma, and Puerto Rico did not offer programs in the summer term.

#### PARTICIPATION BY SERVICE AREA

In 1986-87, attendance and guidance services were received by the largest percentage of participants (79 percent), followed by reading (66 percent), and mathematics (65 percent). (Figure 7 and Table 14)

In the instructional service categories, all states with summer term programs provided reading and all states except one offered mathematics to migrant participants. Thirty-three states provided reading to over one-half of the participants in migrant education programs, and 29 states served over one-half of the migrart students in mathematics. In the supporting service areas, most states offered attendance and guidance, health, nutrition, and transportation services. Ten states did not provide dental services. (Tables 15 and B.11)

The number of participants receiving instructional and supporting services increased in six service areas and remained virtually the same in a seventh area. The largest increases were reported in the supporting service areas—attendance and guidance (34 percent), health (12 percent), and dental (8 percent). Smaller increases were found in three instructional service areas—mathematics (7 percent), reading (6 percent), and English to limited English background (2 percent). The largest decreases were in other instructional services (54

44

percent), followed by other language arts (14 percent) and other supporting services (12 percent). (See Appendix E for a description of the types of other services reported, by state.)

The observed year-to-year changes on a national level can often be better understood by examining the underlying state changes. First, although about one-half of the states reported decreases in reading, mathematics, and attendance and guidance, the increases nationally in these three areas can be attributed to large increases in California. Second, increases in Illinois, Michigan, and Ohio accounte for the reported increase in the number receiving health services nationally. Third, Colorado and Illinois accounted for 83 percent of the decrease in the other instructional services category. Colorado indicated that the decrease was due to fluctuations in reporting, while the Illinois SEA could not explain the decline (from 12,192 students served in other instruction in 1985-86 to 135 in 1986-87). Finally, although over one-half of the states reported decreases in other language arts, three states were primarily responsible for the decrease nationally. Massachusetts eliminated and Washington significantly reduced their other language arts programs, opting to emphasize English to limited English background services. 10 In 1986-87, Oregon reported serving significantly fewer participants in the other language arcs category than in the previous year. (Table C.11)

#### SUMMER TERM STAFFING

In 1986-87, there were 10,427 FTE staff funded by the migrant education program in the summer term. The three categories of instructional staff (teachers, teacher aides, and curriculum specialists) composed nearly three-quarters of the total staff in the summer term. (Figure 8 and Table 16)

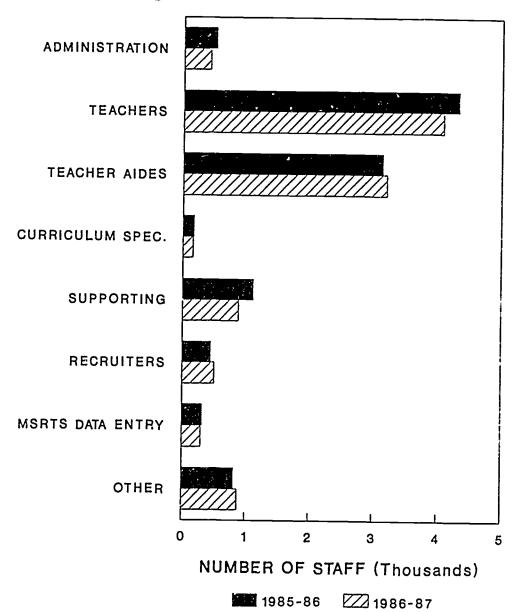

Total staff decreased 4 percent (456 FTE staff) from 1985-86 to 1986-87. There were decreases in five staff categories, with the largest decrease reported in supporting services (22 percent), followed by administrative (19 percent), and curriculum specialists and MSRTS data entry specialists (9 percent each). Teachers decreased 6 percent. The three staff categories experiencing increases were recruiters (12 percent), other staff (7 percent), and teacher aides (2 percent). (Table 16)

Examining the distribution of staff by state reveals that the number of teachers, which decreased 6 percent nationally, declined in over one-half of the states and experienced no change in five states. The number of teacher aides, which increased 2 percent nationally, showed a decrease in 19 states and an increase in 19 states (with three states reporting no change). In the administration and other staff categories, however, California con ributed, in large part, to the observed shifts in the national year-to-year totals. (See Appendix E for the type of other stat? reported, by state.) (Table C.12)

2/ Florida is reviewing the information submitted for 1986-87; revised numbers were not available for this report.

Arkansas, the District of Columbia, Mississippi, Nevada, Oklahoma, Puerto Rico, and South Dakota did not offer migrant education programs in the summer 'rm in 1985-86. In 1986-87, the District of Columbia, Iowa, Louisiana, Mississippi. Nevada, Oklahoma, and Puerto Rico did not offer programs in the summer term.

South Dakota did not report summer FTE staff in 1986-87.

See Appendix Tables B.12 and C.12 for state-by-state FTE staff data.

b/ See Appendix E for the type of other staff reported, by state.

#### REGULAR TERM AND SUMMER TERM COMPARISONS

#### PARTICIPATION BY GRADE, 1986-87

In 1986-87, there were 300,674 migrant education participants in the regular term and 104,751 in the summer term. The distribution of students by state varied by term. In the regular term, 55 percent of the participants were located in California and Texas, followed by Florida, Arizona, and Oregon. Almost one-half of the participants in the summer term were reported by California, followed by Michigan, Oregon, Massachusetts, and Texas. (Table 17)

The distribution of participants by grade span was not the same in the regular and summer terms. While both terms had the largest percentage of participants in grades 1-6, the summer term had the next largest in prekindergarten and kindergarten, and the regular term's next largest percentage was in grades 7-9. In both terms, the smallest percentage was in grades 10-12. (Figure 9)

## PARTICIPATION BY SERVICE AREA, 1986-87

A larger percentage of participants in the summer term than in the regular term received services in each of the service categories except other supporting services. About two-thirds of the migrant education participants in the summer term received reading and mathematics, compared to 44 percent receiving reading and 32 percent receiving mathematics in the regular term. (Figure 10)

#### STAFFING, 1986-87

Differences were seen in the distribution of staff in the two terms--in the regular term, there were more teacher aides (47 percent) than teachers (24 percent), whereas in the summer term, there were more teachers (39 percent) than teacher aides (31 percent). (Figure 11)

When teachers and teacher aides are combined, there were 7,587 such staff in the regular term versus 7,301 in the summer term. While the number of teachers and teacher aides in both terms were almost the same, the teachers/teacher aides provided services to one-third the number of participants in the summer term than in the regular term. Indeed, there is a significant difference in the participant to teacher/teacher aide ratio in the two terms. In the regular term, the ratio was 39.6 participants per teacher/teacher aide, compared to 7 participants per teacher/teacher aide in the summer term.

#### APPENDIX A -- METHODOLOGY

The U.S. Department of Education (ED) received State Performance Reports for 1986-87 in the winter and early spring of 1988, and proceeded to enter the participation information into LOTUS 1-2-3 files.

Decision Resources Corporation (DRC), contracted by the Office of Planning, Budget, and Evaluation (OPBE) to review, correct, and summarize the State Performance Reports, performed edit checks on the participation information and reviewed the achievement information provided by the SEAs. The purpose of the edit checks was to flag potential problems, not to claim that the information was necessarily in error.

The edit process for the participation data focused on examining the information submitted for 1985-86 and 1986-87, and highlighting year-to-year changes that appeared to be unusually high.

DRC subsequently prepared state-by-state listings of the information submitted by the SEAs, highlighting any data items that were identified through the edit process, and sent them to the SEAs for their review.

DRC staff then placed telephone calls to each SEA to elicit their response. In several instances, SEAs revised data for either 1985-86 or 1986-87.11 However, in most cases, either the SEA responded that the information had been reviewed and was correct, or the SEA offered explanations for data items highlighted by the review process.

For the achievement data, SEAs were asked to verify or clarify DRC staff's understanding of the information that had been provided to ED.

At the conclusion of this process, DRC entered the revisions into the Chapter 1 migrant education data base and produced two documents for ED--a State Feedback Report for each SEA and this summary report entitled A Summary of State Chapter 1 Migrant Education Program Participation and Achievement Information for 1986-1987, Volume 1: Participation and Volume 2: Achievement.

llTo the extent states revised their figures, the numbers found in this report will not correspond with those found in previous documents displaying State Performance Report information.

# APPENDIX B -- PARTICIPATION AND STAFFING INFORMATION BY STATE FOR 1986-87

This appendix provides state level tables displaying the participation and staffing information for 1986-87. For each category of information, the number and percent are displayed. The following tables are included:

- o Table B.1 -- participation by ethnic group,
- O Table B.2 -- participation by migrant status,
- O Table B.3 -- participation by gender,
- o Table B.4 -- participation by year of birth,
- o Table B.5 -- regular term participation by grade span,
- Table B.6 -- regular term participation by grade level,
- o Table B.7 -- regular term participation by service area,

# APPENDIX C -- PARTICIPATION AND STAFFING INFORMATION BY STATE FOR 1985-86 AND 1986-87

This appendix provides state level tables displaying the participation and staffing information for 1985-86 and 1986-87. For each category of information, the number for each year and the percent change from one year to the next are displayed. The following tables are included:

- o Table C.1 -- participation by ethnic group,
- Table C.2 -- participation by migrant status,
- o Table C.3 -- participation by gender,
- O Table C.4 -- participation by year of birth (1985-86 only),
- o Table C.5 -- regular term participation by grade span,
- o Table C.6 -- regular term participation by grade level,
- o Table C.7 -- regular term participation by service area,
- o Table C.8 -- regular term staff,
- o Table C.9 -- summer term participation by grade span,
- o Table C.10 -- summer term participation by grade level,
- o Table C.ll -- summer term participation by service area, and
- o Table C.12 -- summer term staff.
